PROFESSIONAL SUMMARY

Final-year B.Tech CSE (AI/ML) student seeking an AI Forward Deployed Engineer internship, with self-driven experience building practical AI systems using LLMs, AI agents, prompt engineering, and RAG. Built and tested voice and conversational AI agents for lead qualification, customer support, and appointment scheduling — including real-estate sales use cases involving function calling, structured outputs, and CRM-ready workflows. Comfortable rapidly prototyping, debugging edge cases, and translating ambiguous business requirements into working AI solutions. Open to an on-site Bengaluru internship and customer-facing engineering work.

TECHNICAL SKILLS

Programming & Data: Python, SQL, Java, C++, JSON

LLMs & Generative AI: Prompt Engineering, System Prompts, Few-Shot Prompting, Structured Outputs, Function Calling / Tool Use, AI Agents, Agentic Workflows

Conversational AI: Conversation Design, Intent Detection, Context Management, Guardrails, Fallback Handling, Multi-turn Conversations, Agent Personas

RAG & Knowledge Systems: Retrieval-Augmented Generation, Embeddings, Semantic Search, Document Retrieval, Grounded Generation

Voice AI: Speech-to-Text (STT), Text-to-Speech (TTS), Voice Agents, Call Workflows

APIs & Integration: REST APIs, Webhooks, Authentication, CRM Integration Concepts

Tools: Git, GitHub, VS Code, Vercel, Serverless Architecture

AI PROJECTS

Real Estate AI Voice Sales Agent | [Python](#) · [LLM API](#) · [RAG](#) · [Function Calling](#) · [STT/TTS](#)

- Built a conversational agent for real-estate lead qualification, designing multi-turn flows to capture budget, location, property type, and possession requirements.
- Implemented persona, guardrails, fallback, and escalation logic; connected the agent to a RAG-backed property knowledge base for grounded responses.
- Added function-calling workflows for property search, lead capture, and appointment scheduling; integrated STT/TTS for a complete voice interaction pipeline.

AI Sales Lead Qualification & CRM Agent | [Python](#) · [LLMs](#) · [REST APIs](#) · [Function Calling](#) · [Structured Outputs](#)

- Developed an agent that determines lead intent, requirements, budget, and urgency from natural-language sales conversations.
- Designed structured LLM outputs and tool-selection logic for automated lead creation, follow-up scheduling, and status updates.
- Added guardrails against invented pricing/availability data and evaluated the agent across multiple failure-mode scenarios.

Real Estate RAG Knowledge Assistant | [Python](#) · [LLM API](#) · [RAG](#) · [Embeddings](#) · [Vector Search](#)

- Built a RAG pipeline over project data (amenities, pricing, specifications, FAQs) to answer customer questions with grounded, non-hallucinated responses.
- Tested retrieval quality across varied phrasings of the same query; designed it to serve as the knowledge layer for a larger voice/sales agent.

AI Customer Support & Appointment Scheduling Agent | [Python](#) · [LLM API](#) · [Function Calling](#) · [REST APIs](#)

- Built a multi-purpose agent handling information requests, lead qualification, booking, rescheduling, and escalation via structured tool schemas.
- Implemented conversation-state handling for multi-turn context retention and tested successful, incomplete, and adversarial scenarios.

CERTIFICATIONS

- Applied Machine Learning in Python — University of Michigan (Coursera), Nov 2025
- Google IT Support Certificate — Google Career Certificates, Jan 2026
- Fundamentals of AI & ML — VITYarthi, VIT Bhopal University, Sep 2024
- Python Essentials — VITYarthi, VIT Bhopal University, Nov 2025
- AI Project Completion Certificate — Techkriti'24, IIT Kanpur, 2024

EDUCATION

B.Tech, Computer Science and Engineering — Specialization in AI & ML

VIT Bhopal University • Expected Graduation: 2026
