🎓 Education

VIT Bhopal University

Bhopal, India

Bachelor of Technology in Computer Science and Engineering; Specialization in AI & ML

Expected Graduation: 2027

🏢 Experience

MPOnline

Remote

Software Engineering & AI Intern

May 2026 – August 2026

- Built **EventPulse**, an Event Management System from scratch using **ASP.NET Core MVC, Razor Views, C#, JavaScript, Entity Framework Core, and SQL Server**.
- Developed presentation-layer components and contributed to **authentication APIs** using ASP.NET Core Identity, including registration, login, role-based access, event workflows, dashboards, and API integration.

🔧 Technical Skills

Languages: Python, SQL, Java, C++, C#, JavaScript, JSON

Generative AI: LLM APIs, Prompt Engineering, Structured Outputs, Function Calling, AI Agents, Agentic Workflows

Conversational AI: Conversation Design, Intent Detection, Context Management, Guardrails, Fallback Handling, Multi-turn Conversations, STT/TTS

RAG & Knowledge Systems: Retrieval-Augmented Generation, Embeddings, Semantic Search, Vector Search, Document Retrieval, Grounded Generation

Development: REST APIs, ASP.NET Core MVC, Entity Framework Core, ASP.NET Core Identity, Git, GitHub, Swagger/OpenAPI, VS Code, Vercel

📁 Projects

Real Estate AI Voice Sales Agent — Python, LLM APIs, RAG, Function Calling, STT/TTS [🔗](#)

- Built a conversational AI sales agent for **real-estate lead qualification**, capturing budget, location, property type, and possession requirements through multi-turn voice conversations.
- Implemented **RAG-grounded responses**, guardrails, fallback handling, **function calling**, property search, lead capture, appointment scheduling, and **STT/TTS**.

Real Estate RAG Knowledge Assistant — Python, LLM APIs, RAG, Embeddings, Vector Search [🔗](#)

- Built a **RAG-based knowledge assistant** over real-estate data including amenities, pricing, specifications, and FAQs to generate grounded customer responses.
- Designed **semantic retrieval** and evaluated varied user queries, creating a reusable knowledge layer for voice and sales-agent workflows.

AI Sales Lead Qualification & CRM Agent — Python, LLMs, REST APIs, Function Calling [🔗](#)

- Developed an AI sales agent that extracts **lead intent, requirements, budget, and urgency** from natural-language conversations and produces structured outputs.
- Implemented **function-calling workflows** for lead creation, follow-up scheduling, CRM-ready status updates, and validation against unsupported pricing or availability claims.

AI Customer Support & Appointment Scheduling Agent — Python, LLM APIs, Function Calling, REST APIs [🔗](#)

- Built a multi-purpose AI agent supporting **information requests, lead qualification, appointment booking, rescheduling, and escalation** through structured tools.
- Implemented **conversation-state management** for multi-turn context retention and tested successful, incomplete, and adversarial interaction scenarios.

🌟 Certifications

- **Advanced Software Engineering & AI Foundation Certification** — MPOnline, 2026
- **Applied Machine Learning in Python** — University of Michigan (Coursera), 2025
- **Google IT Support Certificate** — Google Career Certificates, 2026
- **Fundamentals of AI & ML** — VITyarthi, 2024
- **Python Essentials** — VITyarthi, 2025
- **AI Project Completion Certificate** — Techkriti'24, IIT Kanpur, 2024
